HP is targeted at individual customers, not businesses, and is typically preferred for those customers who value product flexibility and the option of car ownership over a low price. The product features and criteria are designed to support these needs

Key characteristics and benefits of HP are:

Product Characteristics	Product benefits
<ul style="list-style-type: none">- HP is aimed at customers who are looking for a straightforward finance agreement with the option to own the vehicle.- Contracts operate by allowing customers to hire a vehicle for a fixed period with the option to own the vehicle at the end of the agreement, through the payment of a small “option to purchase fee”.- These agreements are normally fixed cost, meaning that the APR (Annual Percentage Rate) is set before the contract begins.- The loan period is also fixed – typically three to five years – and the finance agreement is secured against the vehicle.- Customers are the ‘registered keeper’ of the vehicle and are responsible for insuring and maintaining it, but the finance company remains the legal owner until the full amount borrowed has been repaid including the option to purchase fee.	<ul style="list-style-type: none">- Hire Purchase allows the customer to spread the cost of an asset over a longer period of time, making it more affordable to purchase.- The interest rate on a Hire Purchase agreement is fixed for the duration of the contract, which means customers can budget effectively and avoid any surprises.- Hire Purchase agreements can be tailored to customer specific needs, such as the length of the contract and the size of the deposit.
